Project Overview

In 2011, the City adopted a Parks and Trails Master Plan. Through the planning process, the community expressed strong support for trails, identifying walking and biking trails as the most important park and recreation need in Glendora. Based on that input and an assessment of trail opportunities in the city, the plan identified the three washes (Little Dalton, Big Dalton and San Dimas) as priority trail corridors.

The City is moving forward with planning for trails along these three washes that flow through Glendora, starting with San Dimas Wash as a pilot project.

Project Benefits

Trails can yield a multitude of community benefits:

- **Health**: Trails provide close-to-home opportunities for physical activity which contributes to better health
- **Recreation**: Activities such as walking, biking and horseback riding on trails provides expanded recreation opportunities, and can provide connections to regional trail networks
- **Non-motorized Transportation**: In addition to facilitating recreation, trails also serve as non-motorized transportation facilities for bicyclists and pedestrians and can connect neighborhoods to schools, shopping areas, and other destinations.
- **Economic Benefits**: Trails are often cited as desired amenities when people are looking for a home. Having amenities such as trails near a home can increase its property value.

Project Process

The trail planning process will include identification of existing conditions along San Dimas Wash, assessment of opportunities and challenges, defining of project goals, and development of planning and design recommendations. As part of this process, input will be collected from adjacent residents, businesses, and the community. This process will help the City obtain funding for design and construction to implement the trail vision.

How You Can Participate!

Your input into the trail plan and design will be important to creating a successful project that will serve as a model for future trails in Glendora. There are several ways you can get involved:

- Attend public meetings and workshops
- Provide comments and feedback
- Check our website for updates:
